

Real facts on making money from home.

Making money on the internet is no fluke as more and more homeowners are already embracing the recent technological innovations that may change the future of the world. Making money from home is a serious industry that generated \$450 billion annually even surpassing such famed industries as food, pharmaceutical and consumer health. According to a recent survey by US small business administration, almost 54 percent of the US households are engaged in some kind of revenue generating activity from their homes.

Internet has played an instrumental role in providing the resources required to create a home based professional enterprise. You can literally sit in your Pajamas and earn consistent income from part time data entry jobs, affiliate programs and stock trading. How much money is anyone's guess but IDC, a leading research firm, indicated that nearly 51 percent of the home business are generating on average \$40,000 working from home.

Accounting for 70 percent of all sales, women have capitalized on this opportunity by holding a lions share of home based businesses. The recent stock market crash of 2008 and its subsequent impact on a troubled world economy should make everyone think about working from their homes.

Those who are able to make money sitting at their home offices are already reaping the benefits of being their own Boss. Related [Turnkey home business](#) . [Home based business opportunity](#) .
